The number of alcohol-related crashes decreased in New Mexico from 128 in 2012 to 106 last year. The number of DWI arrests was also down, and one less person died in a drunken-driving crash in 2013 than the previous year. One factor is the state’s ignition interlock law, which mandates one of the devices for all DWI offenders. Source: Santa Fe Prevention Alliance, 2013

Impairment is not determined by the type of drink, but rather by the amount of alcohol consumed over time. Source: National Highway Insurance Institute for Highway Safety, 2012

Drinking and driving continues to be an issue of great importance. Drinking and driving rounds out the list of teens’ top three social concerns. More than one-third of teens (35%) cite drinking and driving as an issue they care strongly about, making it their top life-and-death issue and ranking it third overall following child abuse (40%) and education (40%). Source: The TRU Study, 2012

Drivers with a BAC level of .08 or higher in fatal crashes in 2012 were seven times more likely to have had a prior conviction for driving while impaired than were drivers with no alcohol. Source: Federal Bureau of Investigation, 2011

Americans take 233 billion trips in cars each year. Of those, about one out of every two thousand trips are taken by those who are driving under the influence of alcohol. Yet, almost 1 out of every 3 traffic deaths involve drunk driving. Source: Federal Highway Administration/National Highway Traffic Safety 2009

In 2012, a total of 1,168 children age 14 and younger were killed in motor vehicle traffic crashes. Of those 1,168 fatalities, 239 (20%) occurred in alcohol-impaired driving crashes. Out of those 239 deaths, 124 (52%) were occupants of a vehicle with a driver who had a BAC level of .08 or higher, and another 38 children (16%) were pedestrians or pedalcyclists struck by drivers with BACs of .08 or higher. Source: National Highway Traffic Safety Administration,FARS Data, 2013

For young drivers (15 to 20-year olds) alcohol involvement in fatal crashes is higher among male drivers than their female peers – 29% among males compared to 16% among females. Source: National Highway Traffic Safety

In 2012, 15% of all drivers involved in fatal crashes during the week were alcohol-impaired, compared to 30% on weekends. Source: National Highway Traffic Safety Administration,FARS Data, 2013
