Regain your license in Maine

with a state certified ignition interlock

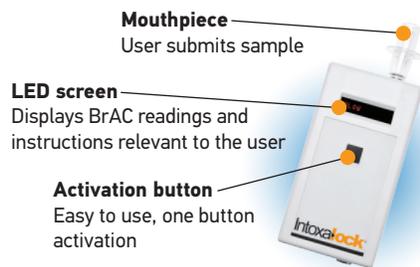

HOW CAN I GET MY LICENSE BACK?

If you are reading this brochure, it is likely that you or a loved one has been pulled over for Operating Under the Influence (OUI). Getting an ignition interlock device installed in your vehicle is an important step in regaining your license in Maine. This brochure will take you through all the necessary steps based on your offense and will assist you in getting back on the road quickly and legally.*

*State laws can change at any time. The information in this brochure is just a guideline. For the most up to date information, check www.maine.gov/dps/bhs/impaired-driving/laws.html.

WHAT IS AN IGNITION INTERLOCK?

An ignition interlock device (IID) integrates breath alcohol testing with your vehicle's ignition system. Prior to starting your vehicle, you will need to submit a breath sample into the hand held portion of the device that tests for the presence of alcohol. If your Breath Alcohol Concentration (BrAC) is below Maine's ignition interlock limit, your vehicle will start. If alcohol is detected, your vehicle will not start until a passing sample has been provided.

ABOUT INTOXALOCK

Intoxalock has been manufacturing ignition interlocks for over 20 years. We were the first company to use fuel cell technology and continue to be an industry leader in reliability, customer service and technology.

- Over 90,000 customers served annually
- Over 1,600 service centers nationwide
- 20 years of industry leadership

IMPLIED CONSENT

Under Implied Consent, you automatically agree to a chemical test (blood, breath, or urine) at any time authorities have probable cause to administer it. If you refuse to take such a test, your driver's license will be immediately suspended. The suspension could be for a period of up to six years.

Because it is an administrative suspension, no court action is necessary. Additionally, testimony from the arresting officer regarding your driving performance can result in an OUI conviction even without the BAC test.

If you are found guilty of OUI based on the police officer's testimony, your refusal to take a test will be considered as an aggravating factor by the judge and another suspension, as well as mandatory jail time, will be included.

ZERO TOLERANCE LAW

The State of Maine has a special law if you are under 21 years of age. If you are found operating, or attempting to operate, a motor vehicle with any measurable amount of alcohol in your body, you will lose your license for one year. If you refuse a test, you will lose your license for at least 18 months. If you have a passenger under 21 years of age, an additional 180 day suspension will be imposed.

Drivers under 21 years of age with a BAC of 0.08 or more can be prosecuted for the criminal offense of OUI, but the license suspension must be for one year.

FIRST OFFENSE

If your license is suspended for a first offense OUI, you may regain your driving privileges with the installation of an ignition interlock device.

In order to reinstate driving privileges you must:

- Serve 30 days of license suspension
- Serve jail time, if required
- Completion of alcohol/substance abuse assessment and education program
- Pay applicable reinstatement fees and fines

A person who qualifies for restoration of driving privileges with an ignition interlock device must file an Ignition Interlock Petition Form with the Secretary of State and receive written approval prior to having the device installed.

SECOND OFFENSE

If your license is suspended for a second offense OUI, you may regain your driving privileges with the installation of an ignition interlock device.

In order to reinstate driving privileges you must:

- Serve nine months of license suspension
- Serve jail time, if required
- Completion of alcohol/substance abuse assessment and education program
- Pay applicable reinstatement fees and fines

An ignition interlock device can be installed nine months after the beginning of the suspension period. A person who qualifies for restoration with an ignition interlock device must file an Ignition Interlock Petition Form with the Secretary of State and receive written approval prior to having the device installed.

THIRD OFFENSE

If your license is suspended for a third offense OUI, you may regain your driving privileges with the installation of an ignition interlock device.

In order to reinstate driving privileges you must:

- Serve at least three years of a license suspension
- Serve jail time, if required
- Completion of alcohol/substance abuse assessment and education program
- Pay applicable reinstatement fees and fines

An ignition interlock device can be installed three years after the beginning of the suspension period. A person who qualifies for restoration of driving privileges with an ignition interlock device must file an Ignition Interlock Petition Form with the Secretary of State and receive written approval prior to having the device installed.

WE PROUDLY MAINTAIN A 4 ½
STAR CUSTOMER SATISFACTION
RATING ON TRUSTPILOT.

CALIBRATIONS

The State of Maine requires that all ignition interlock devices be calibrated 30 days after the initial installation and every 60 days thereafter. A calibration consists of exchanging your current device for a newly calibrated one, ensuring accurate and consistent testing.

Intoxalock auto-calibrations

Intoxalock offers its customers auto-calibrations in the State of Maine. When it is time for calibration, the LED screen will display a message alerting you it is time to exchange devices. Intoxalock will automatically send a new one to your selected service center. You simply need to visit your service center during the allotted calibration period and the technician can quickly exchange the device.

LAST YEAR, INTOXALOCK
HELPED OVER 90,000 DRIVERS
GET BACK ON THE ROAD SAFELY
AND RESPONSIBLY.
