

# Interlock Focus

Quarterly newsletter for the interlock industry

Brought to you by: **Intoxalock**

## Unexpected 2014 Legislative Season

This year's legislation has proven to be much more active than anyone would have anticipated. Even numbered years are the second year of states' biennial sessions and election years. Both of these suppress the amount of legislation introduced and passed. Those are also the years in which eight states have shortened to budget-only sessions and another four states, Montana, Nevada, North Dakota, and Texas have no session at all. 2014 was slated to be a light year for ignition interlock legislation... if it had followed the trend.

That being said, eight states are still in a year-round legislative session and passed legislation has already tied 2013 as the most prolific year for ignition interlock law changes. Year to date, 15 bills have hit the desks of Governors all across the country. There is a decent chance that another will pass and break the record.

Some of the bills include major pieces of legislation. Indiana went from a program with minimal sanctions to one that requires

**15:**

The number of ignition interlock bills that have hit the desk of Governors across the country

ignition interlocks for all offenders. Connecticut also joined the ranks of the "all offenders required" program states. Idaho mandated that every repeat offender install an ignition interlock. Florida dumped their exclusive interlock provider system and opened the entire state up to all interlock companies. Lastly, Mississippi made substantial improvements to their year old law requiring driver's license suspension times.

### What does next year hold for ignition interlocks?

All eyes are on the west coast as California's massive four county first offenders Pilot Program is set to expire at the end of the year. Will it sunset? Will it be extended? Or will it be expanded statewide and made permanent? Given California's size, the stakes are huge. ■

## Intoxalock is proud to introduce eLERT 24

We at Intoxalock, pride ourselves in being the leader in industry innovation. Our newest product, eLERT 24, takes advanced technology to the next level. "We believe the unique combination of features provided by the eLERT 24 device will revolutionize how clients are monitored," states Fernando Velazquez, Intoxalock VP of Operations.

"eLERT 24 combines the functionality of an advanced technology ignition interlock device with the added assurances of 24 hour monitoring."

### How will this benefit monitoring?

eLERT 24 is a fully configured alcohol program that also meets a participant's ignition interlock requirement for regaining driving privileges after an alcohol related driving offense. By selecting the eLERT 24 as a client's IID, clients can also meet additional monitoring requirements which may also include 24 hour testing through scheduled sample times. eLERT 24

can also assist in situations where the client is not driving their car regularly and needs to meet regular sampling requirements.

### One device. One report.

### One fee.

eLERT 24 adds a new level of thoroughness and convenience for monitoring authorities while simultaneously saving the client money over leasing multiple devices. Just one more example of Intoxalock leading the way in alcohol monitoring innovation. ■

## Welcome Ted Tabaka!

It is with great pleasure that we introduce Ted Tabaka, Director of Outside Sales, as the newest member of the Intoxalock team. Ted is responsible for managing our Outside Field Representative Team in support of our referring partners nationwide.

Ted has a strong background in sales management with more than 20 years in the technology and retail fields. Ted's focus will be to grow the overall use of the ignition interlock devices while increasing awareness and public safety. He aims to establish new, successful business relationships as well as continue to look for new ways to support and enhance existing partnerships. As more companies look to protect their assets, Ted also plans to grow our fleet program and provide convenient alcohol

monitoring solutions for businesses. To ensure we are prepared for industry growth, Ted will be adding additional regional representatives thought the country. If you do not know who your local representative is, don't hesitate to contact us, we would be happy to set up an appointment. ■
